Smart GeneralTrend (SGT©)

# GT-APS

Description

The new trend of visuality

The GT-APS Smart GeneralTrend© is a fast, user friendly desktop trending and analysis tool to view csv log files in a graphical view.
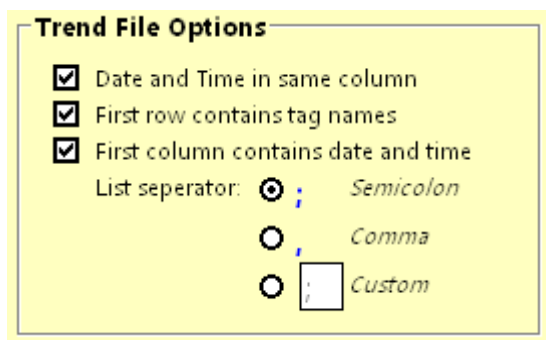

Smart GeneralTrend©'s goal is simplicity and speed.

Flexibility

It doesn't matter how many rows and tags included,

List separator character (mostly ";" and ",") of csv files always a problem to work with,
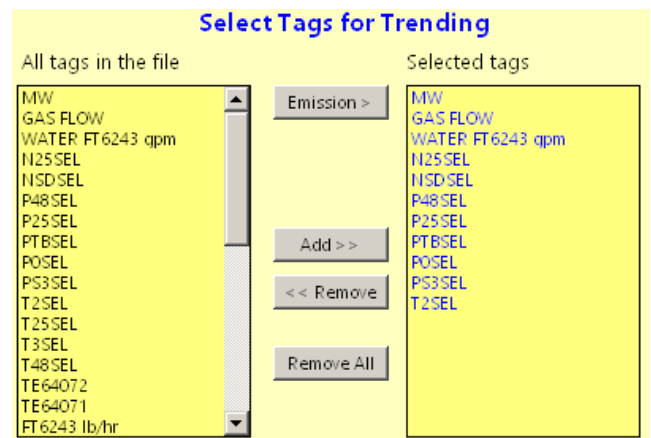

But not a problem for Smart GeneralTrend©. You simply specify and ready to go…

User Friendly

The selection of tags is another phenomenal problem to be viewed in trend graphics.

But with Smart GeneralTrend©, easily select the tags and ready to use…

Upper and lower ranges are calculated automatically by Smart GeneralTrend© to show graphics on the effective screen. Beside, ranges can be altered by user at any time.

Line colors and thickness, one click away.

General Trend

Smart

Smart GeneralTrend© does remember all modifications for each trend file, that's why it's called Smart.....

Start Cycle Graphics   NEW

Smart GeneralTrend© has a very useful diagnostic tool for especially Gas Turbines. If you have PLDR© (Power Log Data Recorder) and you have recorded start cycle period of GT(s), you can easily view and compare any start parameters with previous or older starts in graphical scheme.
